Definitions:

Identified Sites: The address of potential greenstreet has been noted and entered into the Greenstreets database.

Surveyed: The dimensions of greenstreet have been taken, noting the location and type of infrastructure present on site.

Designed: Plan has been drawn indicating the size and placement of planting beds and the species to be planted.

Excavated: Pavement and existing soil have been removed from site, and new topsoil added. Site is ready for planting.

Planted: All trees and shrubs scheduled for the site were planted.
